Parat Solutions to introduce new products at Macworld 2009

Berwyn, PA December 12, 2008 – PARAT Solutions, an innovative manufacturer of mobile computing transport solutions, today announced the introduction of three innovative products to be unveiled at Macworld in San Francisco on January 5, 2009.

The newly released products include an iPod dock that charges and simultaneously synchronizes 20 iPod devices, a first to market mobile charging solution for 10 MacBook or iBook batteries developed jointly with Oncore Power Systems and a mobile presentation solution for eBeam interactive whiteboards.

PARAT's comprehensive product offerings dedicated to the Apple brand and associated complementary products efficiently solve users' challenges in the distribution, collection, management and transport of multiple devices. PARAT Solutions Director of Sales Peter Jauss stated, "The enthusiasm in the marketplace generated by our products at our first Macworld last year was profound. We intend to build on that excitement with the unveiling of new products which expand our already unparalleled suite of products for Apple that store, charge, transport, protect and synchronize multiple mobile devices."

"Our ongoing passion is to develop creative solutions which enable users to transport, manage and deploy multiple computing devices amongst as many users as possible and to do so cost-effectively, conveniently and flexibly," stated Martin Andrelang, Product Manager.

PARAT Solutions will be located at Macworld booth # 4034.

About PARAT Solutions

PARAT Solutions, an independent U.S. affiliate of PARAT-Werke, develops and manufactures "smart products for mobile computing" which secure, store, transport, protect, charge and synchronize multiple mobile computing devices.
